<p>The minor in Culture, Health, and Human Development (CHHD) is an interdisciplinary minor that fosters an integrative cultural perspective on human development and health, including issues related to diversity both within and across various populations. By providing students an opportunity to explore systematic relationships among culture, health, and human development, the minor can address gaps between the traditional disciplines. It is intended to improve understanding and respect across perceived cultural, racial, and ethnic boundaries, and to encourage culturally informed approaches in the social and health services.</p> <p>Fifteen credits (primarily at the 2000-level or above) are required for the CHHD minor, to be chosen from the courses listed below. No more than six credits can be applied from any one category: culture, health, or human development. Further, students can count toward this minor no more than six credits in their major. Other credit restrictions may apply by major.</p> <p>The CHHD minor is organized by the Center for the Study of Culture, Health, and Human Development, and managed by the Department of Human Development and Family Sciences.</p> <p><i>Category 1: Culture</i> AAAS 2200, AAAS 2201, AAAS 2210, AFRA 2250, AFRA 3501, AH 2330, AH 4501,</p>	<p>The minor in Culture, Health, and Human Development (CHHD) is an interdisciplinary minor that fosters an integrative cultural perspective on human development and health, including issues related to diversity both within and across various populations. Human Rights

The field of concentration in Human Rights gives students an understanding of the legal instruments, norms, and institutions that constitute contemporary human rights law, as well as the social movements, cultural practices,

and literary and artistic representations that have and continue to imagine the human rights ethic in various ways. In recent years, the human rights dimensions of many of the most vexing and pertinent issues at the global, national, and local level have gained prominence - including the problems of environmental deterioration, economic inequality, and ethnic and religious conflict. Students who major in Human Rights will be better equipped not only to understand the complex nature of these and other issues, but also to develop and pursue novel approaches toward a better world. In addition to studying the manifold histories, theories, and practices of human rights in a systematic and comprehensive manner, students majoring in Human Rights will also develop more specialized methodological and topical expertise in a second discipline.

To complete the Major in Human Rights, students are required to complete an additional, primary major offered in the College of Liberal Arts and Sciences or an additional degree program offered in another University School or College. For students completing a double major within the College of Liberal Arts and Sciences, a minimum of 48 credits without overlap is required to earn both majors and students will receive one degree appropriate to their primary major.

For students completing a dual degree, all requirements for each degree must be met and at least 18 unique additional credits more than the degree with the higher minimum-credit requirement must be completed (e.g. School of Nursing and CLAS, CLAS requires 120 credits to graduate, $120 + 18 = 138$ credits to graduate with both degrees) and students will receive a Bachelor of Arts in Human Rights along with another degree appropriate to their second program. All 18 credits for the additional degree must be at the 2000 level or higher.

Physiology and Neurobiology	Physiology and Neurobiology

This B.S. program in Physiology and Neurobiology is intended to provide students with a foundational understanding of body and brain functions at the molecular, cellular and systemic levels by synthesizing current and emerging ideas from research and medical science. Course offerings span comparative and model system physiology, nervous system function and development, endocrinology, cardiorespiratory physiology, and associated diseases. Additionally, we also offer coursework and independent study based undergraduate research opportunities.

The following courses are required to earn a B.S. degree in the college of liberal arts and sciences:

- BIOL 1107
- CHEM 1124Q–1126Q or 1127Q–1128Q;
- MATH 1131Q–1132Q
- PHYS
1201Q–1202Q–1230 or 1401Q–1402Q or
1601Q–1602Q.

PNB Major Requirements:

Undergraduate majors must complete at least 24 credits in PNB at the 2000 or higher level, including:

- All courses in the core group
- At least three courses from the physiology and neurobiology groups, with at least one course from the physiology group and at least one course from neurobiology group.
- At least one course from the experiential group
- At least one W course in PNB (which may be fulfilled from the experiential group)

Core Group

- PNB2274 and PNB2275
- PNB3251

Physiology Group

- PNB2250, PNB3252, PNB3262, PNB3265, PNB3270, PNB3350, and PNB3500
